

It takes a technologically advanced facility to manufacture
the most technologically advanced
Cellular Core Electrical Conduit!

- ◆ *Pioneers of Cellular Core Technology*
- ◆ *Increased flexibility for tighter radius field bends.*
- ◆ *Up to 25% lighter weight makes for easier installation.*
 - ◆ *Increased impact values*
- ◆ *Smooth glossy interior surface minimizes friction during cable pulls.*
 - ◆ *Contains 30% more UV inhibitors for sunlight resistant.*
 - ◆ *Consistent gray color not diluted with fillers.*
 - ◆ *Easy to read print so you know its COR-TEK™*

Cellular Core Technology was first successfully developed in the electrical market by Rocky Mountain Colby in 2009. The COR-TEK™ brand name identifies the company with the “Cellular Core Technology” process, in which we feel we are the undisputed manufacturing and technological leader in the electrical industry.
